

## Automatic Corrosion Resistant Corrosive Liquid Filler High Performance Filling Machine

ONE MACHINE FOR YOU  
CURRENT AND FUTURE  
NEEDS

### CORROSION RESISTANT CORROSIVE LIQUID FILLER

If your business deals with filling corrosive liquids into containers, you understand the challenges that can come with finding machinery that can accommodate those liquids. At STRPACK, we are proud to offer corrosive filling machinery, including a corrosion resistant corrosive liquid filling machine. Our corrosive fillers, machined out of HDPE (high density polyethylene), are designed to handle the harsh punishment that comes along with corrosive liquids. The fillers are capable of handling a variety of viscosities, perfect for accommodating a number of different industries' products.

Cleaning products, Chemicals, Bases such as sodium hypochlorite  
Acids including hydrochloric acid, Water-thin and foaming corrosive liquids, Pool chemicals

Maximum speed of  
**100** bottles/min

**5 - 45** minute  
changeover time between bottles
